At the time of ordering our products are delivered untreated. Until they are treated wooden products are highly susceptible to variations in humidity and temperature which can cause movement in the wood. We strongly recommend, that our care and treatment instructions, supplied with every product, are followed and that the instructions provided by the manufacturer or whatever product is used to seal the wood are strictly adhered to. In particular it is important to store the products properly and to make sure that they are treated as soon as possible after delivery.

We take no responsibility for the results of inadequate treatment or poor storage conditions.

Doors and windows should be stored flat and clear off the floor, on three bearers longer than the width of the doors.

## TREATMENT AND INSTALLATION

Installation and treatment of the product must be completed by a **qualified installer**, more particularly a registered and **qualified carpenter**.

Installation by a non-qualified installer will result in the voiding of guarantees and warranties. A sealant suitable for the intended location of the product must be applied, in strict accordance with the manufacturer's instructions, to all surfaces, including top and bottom, lock cavities etc., no more than seven days after delivery and before installation.
